Full Stack Software Engineer | React, Python, APIs & Databases

SUMMARY

Final-year B.E. student with hands-on experience building **full-stack applications** using React, Django/DRF, FastAPI, SQL/NoSQL databases, Docker, and CI/CD. Develops responsive interfaces, backend services, REST APIs, authentication/RBAC, and reliable database integrations. Brings end-to-end ownership from stakeholder requirements through testing, debugging, deployment, and performance optimization.

EXPERIENCE

- Software Engineering Intern**
Shunya AgriTech

Gurgaon, India (Remote)
Jun 2026 - Aug 2026

 - Built a Django operations dashboard by reverse-engineering a **24-table MySQL schema** into reusable data models, reporting workflows, and business-facing QC metrics.
 - Developed a reusable **Python API test platform** with **Pytest**, Requests, and Flask for stateful, multi-step workflows, validation evidence, and regression detection.
 - Trained and evaluated a **1,320-image** computer-vision workflow; documented results, failure cases, and automation outcomes to support data-driven iteration.
- Software Developer (Part-time)**
Monika Engineers (Family Business)

Ludhiana, Punjab
2023 - Present

 - Translated stakeholder requirements into actionable technical solutions and independently owned delivery from scope definition through rollout.
 - Delivered **3 business applications**: a Python/IMAP/SQLite CRM, React company website, and React Native/Supabase attendance app with reusable data and integration patterns.

FULL STACK PROJECTS

- ArchiAI: AI-Assisted Architectural Design Platform**
Django REST Framework, RAG, Ollama, Docker

Apr 2026 - Present

 - Developed a modular **Django REST** service that transforms natural-language requirements into validated inputs and explainable architecture-design outputs.
 - Optimized database queries and API access patterns, reducing response time by approximately **30%**; secured **15+ REST endpoints** with authentication and RBAC.
 - Implemented asynchronous job tracking, Dockerized deployment, and CI/CD workflows to improve reliability, maintainability, and production readiness.
- LedgerLens: Evidence-First Financial Reconciliation Workspace**
Django REST Framework, React, TypeScript, SQLite

Sep 2026

 - Developed an API-driven **Django/React** workspace with idempotent data ingestion, structured validation contracts, and maintainable service boundaries.
 - Implemented deterministic reconciliation for fees, tax, refunds, settlements, and bank differences in **integer paise**, with immutable payloads and audit trails.
 - Delivered **DRF APIs** and a **React/TypeScript** dashboard for evidence graphs, case workflows, diagnostics, and a cited-evidence AI investigator.
- Binance Futures Trading Bot**
FastAPI, WebSockets, NLP, SQLite, Docker

Apr 2026

 - Co-developed a **FastAPI** application with multi-timeframe processing, WebSocket updates, SQLite persistence, and Docker deployment.
 - Integrated **15+ RSS feeds** with NLP scoring to produce data-informed alerts, dashboard updates, Telegram notifications, and a persistent trade journal.
 - Implemented **5 explicit risk controls**, structured logs, and persistent state for reliable, diagnosable automated workflows.

EDUCATION

- Thapar Institute of Engineering and Technology**
Bachelor of Engineering

Patiala, Punjab
Aug 2024 - May 2027
- Thapar Polytechnic College**
Diploma in Computer Science

Patiala, Punjab
Aug 2021 - Aug 2024

SKILLS

- Languages:** Python, C++, TypeScript, JavaScript, SQL, HTML/CSS, JSON
- Frontend & Backend:** React, React Native, Django, Django REST Framework, FastAPI, Flask, REST APIs, WebSockets, asynchronous processing
- Databases & Security:** PostgreSQL, MySQL, SQLite, MongoDB, data modeling, database integration, authentication, authorization, RBAC
- Testing & Reliability:** Pytest, unit/API/integration testing, regression validation, debugging, structured logs, error handling, performance optimization
- Delivery & Collaboration:** Docker, Git, CI/CD, production deployment, requirements analysis, system design, stakeholder communication, Agile/Scrum, Jira
- Additional:** AWS Academy - Cloud Foundations, Microservices & CI/CD
